

**25MM OVER FASCIA VENTILATOR**

**REF: AIR2500**

BOTH SECTIONS INTERLOCK MAKING THE FINISHED PRODUCT

ALL UNITS MEASURED ARE IN MILLIMETRES

**General**

The AIR2500 over fascia ventilator has been designed to establish a clear airflow of 25,000mm<sup>2</sup> per metre into the cavity between the fascia board and the felt; this makes it a great choice for situations like re-roofing or a new build. It has an integral fly screen specifically designed to be wide enough not to be blocked by water droplets, debris or paint. It has been designed with fixing points that are clear to see and a smooth leading edge that allows it to sit comfortably on top of the fascia board beneath the felt. This vent is supplied assembled in 1m lengths.

**Fitting instructions**

The AIR2500 over fascia ventilator should be positioned directly on top of the fascia board, with the stop section flush against the vertical edge of the fascia board. It should be nailed down through the anchor holes given across the entire length of the eaves. This product can be used with all tiles and can be used in other roofing details.

**Details**

<b>REF</b>	AIR2500	<b>MANUFACTURING PROCESS</b>	Injection moulded
<b>BOX SIZE (MM)</b>	260 x 400 x 1010	<b>MATERIAL</b>	PPC - Polypropylene copolymer
<b>PALLET SIZE (M)</b>	1 X 1.2 X 2		
<b>FREE AREA</b>	25,000mm <sup>2</sup> (EQUIVALENT TO A 25mm GAP) per metre	<b>ASSOCIATED PRODUCTS</b>	AIR500, AIR700, AIR1200, AIR1300, AIR1400, AIR1500
<b>PACKING</b>	Product per box = 50, Boxes per pallet = 20		
<b>WEIGHT</b>	Product = 225g, Box = 11.6kg, pallet = 247kg	<b>COLOUR</b>	BLACK
